INFINITY 4-11

11 Megapixel CCD USB 2.0 Camera

Large format, high-resolution scientific digital imaging for documentation and image analysis in Life Science, Clinical and Material Science Applications

INFINITY4-11

The INFINITY4 USB 2.0 series is a large format, high resolution solution specifically designed for macro applications involving large fields of view. INFINITY4-11 digital CCD camera is based on the Kodak KAI11002 10.7 megapixel sensor. Highlights include 3.5 frames per second at full 4008x2672 resolution, fast 60 fps through binning and ROI, and on-board processing for superior image quality with the field of view of a 35mm camera.

Superior Sensitivity and Color Reproduction

Years of experience in the microscopy market have allowed Lumenera to develop specialized color algorithms ensuring excellent color reproduction. In addition, the software included with all INFINITY cameras allows the adjustment of all facets of the live preview. This allows users to apply their personal preferences to each image. For lower light applications, the Kodak CCD sensor has an extremely high dynamic range, resulting in excellent camera sensitivity.

Full Image Analysis Software Included

INFINITY CAPTURE, an intuitive image capture program, and INFINITY ANALYZE, a full image analysis package offering; camera control, measurement, annotations, tiling and post capture enhancement, are both included. Camera and software combined to create a complete microscopy imaging solution for your application.

USB 2.0 Plug-and-Play Interface

Sharing and installation of one or more cameras on a single computer is quick and simple through a high-speed USB 2.0 interface.

Third-Party Software Integration

INFINITY cameras are integrated into a variety of third-party software packages through direct drivers or with TWAIN/DirectX support.

Mac Camera Software

A Mac camera driver and ImageJ plug-in are available for the INFINITY4-11.

Superior Technical Assistance Center (TAC)

As a customer you gain access to the TAC group and knowledge base which provide full support for cameras, software and microscopy applications.

Features

- Low noise progressive scan 10.7 megapixel Kodak KAI-11002 CCD sensor
- Full color sub-windowing allows for rapid focus and scanning of samples; up to 40 fps at 640x480 resolution
- GPI/O for control of peripherals and synchronization
- 8 or 12-bit pixel data modes
- Software compatible Windows XP, Windows Vista, Windows 7, Windows 8, 32 and 64-bit operating systems
- Includes TWAIN and DirectX/ Direct Show support

Recommended Applications

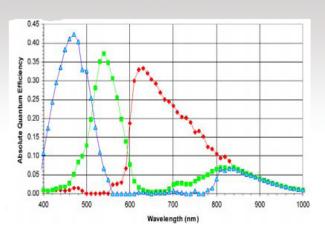

- Brightfield
- Darkfield
- · Live Cell Imaging
- Histology
- Pathology
- Cytology
- Defect Analysis
- Semiconductor Inspection
- Metrology
- Gel Documentation
- Quantitative Analysis

Warranty

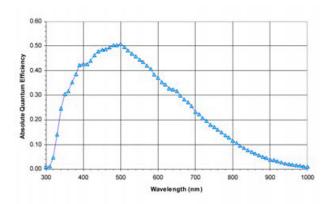

• Two (2) year parts and labor

Microscope Coupler

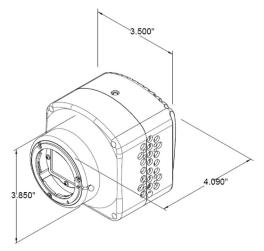

• Requires 1.0 x F-mount coupler
